Did you know?

Cassiopea is a specialty pharmaceutical company developing and commercializing prescription drugs with novel mechanisms of action to address long-standing and essential dermatological conditions, particularly acne, androgenetic alopecia (or AGA) and genital warts. Cassiopea is investing in innovation that is driving scientific advancement in areas that have been largely ignored for decades. Clascoterone solution is in late stage development for the treatment of androgenetic alopecia (AGA). Clascoterone solution is believed to address AGA by directly inhibiting testosterone and DHT binding to local hair follicle androgen receptors. If approved by the FDA, Clascoterone solution has the potential to be the only topical androgen receptor inhibitor for AGA and the first drug with a new mechanism of action for the treatment of AGA in over two decades.

NUTRAFOL®

Dedicated to the science of hair wellness. Nutrafol's physician-formulated, clinically effective hair growth nutraceuticals use a patented formulation of medicalgrade botanicals and standardized ingredients to improve hair growth in both men and women by multi-targeting the root causes of thinning hair, including stress, hormones, metabolism, gut, aging and environmental factors. Nutrafol is trusted by over 3,000 physicians for its integrative approach firmly rooted in pioneering nutraceutical science innovation-with highlyconcentrated natural products shown to be effective in numerous clinical studies. In the most recent clinical trial, Nutrafol Women's Balance showed significant improvement in hair growth and decrease in shedding over placebo in menopausal women with thinning hair after 6 months, with continued progressive improvement at 12 months.
